

Quick Guide

Connecting to Your Network

1. Plug in your Box, and wait for boot sequence to finish.
2. Click the Settings tab/box

3. Choose Network and select either WiFi Or Ethernet (If selecting Ethernet the cable must have already been connected)

4. If choosing WiFi then enter the WiFi Password

5. If Choosing Ethernet wait for the Connected message along with an Ip Address to be displayed.

6. Reboot device by disconnecting power cord waiting 10 seconds then reconnecting the power cord.

Your device should now be connected to your internet service and ready to use.
