<u>Windsor Free TV KODI Box</u>

Thank you for purchasing your KODI Tv Box from WindsorFreeTV.com

In order to keep your box operating properly please note the following precautions:

"<u>Never</u> " click on the Update App, or Update button in the setting menu. (Doing so will cause your KODI and any other Apps that are up to date to stop functioning).

Your TV Box is intended to run the KODI media center. Although many Android Apps can be run the only other recommended App is ShowBox. Running any other Apps can affect the performance of KODI. When using ShowBox only stream do not download.

Under in the Main Menu of KODI under the SYSTEM tab there is a "Clear Cache" button this can be pressed occasionally to ensure the cache is kept to a minimum.

Be sure to exit KODI properly.   Navigate the Main Menu to the POWER button click and choose EXIT, wait for KODI to shut down (This can take about 30 t0 45 seconds).

KODI is self updating. While updates are being applied you will see some boxes popping up, and the operation of KODI will be sluggish. When you see this happening refrain from pressing any buttons until updates are finished. Continued button pressing during updates may/will cause a lockup requiring a system restart (Power Cycle)
