

## **Stream All The Sources Error (SALTS)**

If your box has the Stream All The Sources (SALTS) Add On, and you have not been using it. You are probably experiencing a popup error when starting your box or receiving updates .

This is because the Add On sees its data base as being out dated.

To remove this error simply run the add on, it is located in the MOVIES sub menu. Just click on it and follow the onscreen prompts to Restore and Reset the data base. After doing this the pop up will be resolved the next time KODI is restarted.
